

U4L2: Number sets

Number sets are the collection of numbers that _____ of numbers.

To practice recognizing number sets, challenge a partner to the following game:

- 1) Each partner writes an inequality with a range of 5 numbers.

For example:

- 2) Both partners look at their inequalities and determine which numbers they are looking for.

- 3) Partners take turns flipping their pile of cards until they get 5 cards that fit in the number set.

The first partner to get 5 in a number set is the champion!
